Education

Guru Nanak Dev Engineering College

Bachelor of Technology in Information Technology

2023 - Present

Ludhiana, Punjab

Atam Vidya Mandir School

XII Standard

2023

Ludhiana, Punjab

Experience

Bandhan of Dreams

Full Stack Developer Intern

July 2025 - Aug 2025

Ludhiana, Punjab

- Developed **StudyBuddy**, an AI-powered EdTech platform featuring intelligent note generation, flashcards, quizzes, and learning analytics.
- Built and deployed a scalable React-based platform featuring secure authentication and dynamic dashboards.
- Integrated **AI-driven content generation** and progress tracking to enhance learning efficiency and user engagement.
- Optimized application performance through code-splitting, lazy loading, and modern frontend architecture for a production-ready experience.

Projects

StartupOps : StartupOps: AI-Driven Startup Management Platform | [Live Demo](#) | [GitHub](#)

Tech Stack: Next.js, Node.js, PostgreSQL, Prisma, Socket.io, Gemini API

- Developed a full-stack SaaS platform for startup workspace, project, and milestone management with role-based collaboration.
- Built real-time communication and activity-tracking systems using Socket.io, enabling seamless team coordination and workflow management.
- Integrated Google Gemini AI to automate startup planning workflows, generate investor-ready pitch decks, and provide intelligent task recommendations.
- Developed secure REST APIs with JWT authentication, Google OAuth, and optimized PostgreSQL database operations using Prisma ORM.

Normalizer Pro - AI-Powered Database Schema Automation Platform | [Live Demo](#) | [GitHub](#)

Tech Stack: React.js, TypeScript, Python, Flask, Groq AI, MCP, Razorpay

- Built an AI-powered schema automation platform that converts flat datasets and product ideas into optimized relational database designs.
- Developed intelligent 3NF-style normalization, AI-assisted schema generation, SQL bundle creation, and ER diagram visualization workflows.
- Engineered live database inspection, schema analysis, migration planning, and SQL workspace features for PostgreSQL/MySQL/SQLite.
- Integrated MCP automation, AI workflows, authentication, and subscription-based access to deliver a production-ready developer tool.

Technical Skills

Programming & Web Stack: Python, Java, JavaScript (ES6+), SQL, HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Bootstrap, Tailwind CSS, REST APIs

Databases & Backend: PostgreSQL, MySQL, MongoDB, Firebase, Prisma ORM, API Integration, CRUD Operations

DevOps & Infrastructure: Git, GitHub, Docker, Postman, AWS, CI/CD Pipelines, Jupyter Notebook, Colab

Achievements & Recognition

- **Winner (1st Prize) – THINK-A-THON Inter-College Hackathon**
Created **Normalizer Pro**, a comprehensive **AI-driven database automation tool** designed for smart normalization, schema synthesis, SQL generation, and live analysis with integrated MCP workflows.
- **National Level Competitor – Thal Sainik Camp (TSC) & Firing Competition (IDSSC)**
